

Jeff Bloomer

Adobe Analytics
Champion 2021 to 2026

Middletown, OH 45042 ♦ (937) 216-7303 ♦ jeffbloomer1993@gmail.com

EXECUTIVE SUMMARY

Executive Digital Analytics leader driving measurable outcomes through data governance, Adobe Analytics, Customer Journey Analytics, MarTech, and campaign measurement. I unite people, processes, and platforms to make digital data more trusted, actionable, and scalable. My servant-leadership approach strengthens teams, earns stakeholder trust, and improves execution across functions with team collaboration. As one of 40 global Adobe Analytics Champions, I bring valuable technical credibility, industry connections, and a visible record of advocacy. I turn analytics capability into faster decisions, stronger adoption, and better business performance.

CORE COMPETENCIES/SKILLS

STRATEGIC PLANNING, CROSS-TEAM COLLABORATION, TEAM MANAGEMENT, ADOBE ANALYTICS, SERVANT LEADERSHIP, REPORTING & INSIGHTS, STAKEHOLDER MANAGEMENT, TEAM DEVELOPMENT, CONTINUOUS IMPROVEMENT, MARKETING TECHNOLOGY, CAMPAIGN TRACKING, AI STRATEGY, BUSINESS ANALYSIS, GRAPHIC DESIGN, PROGRAMMING (JAVA, VB FOR APPS), PROJECT MANAGEMENT, VISUAL COMMUNICATIONS

PROFESSIONAL EXPERIENCE

CARDINAL HEALTH – Dublin, Ohio (2025 – 2026)

Manager, Digital Analytics | Jun 2025 to May 2026

- **TEAM GROWTH:** Hired and trained three new contractors – specifically related to project parameters – while focusing on improving the overall team's competencies, skills (including User Acceptance Testing), resulting in their ability to work almost 95% of the time independently without requiring leadership's intervention.
- **DOCUMENTATION:** Starting from less than a bare-bones setup, inside 90 days I trained the team to create a user-friendly filing system within Confluence for the team to document and find the processes they needed at a moment's notice.
- **PRODUCTIVITY:** In less than 60 days, trained and introduced the team to a custom, realistic, and practical productivity planning and tracking tool using Jira, which helped the team to move from reactive "busy" work to create transparency of their project workload to the entire organization.
- **DATA STANDARDS:** Introduced "basic industry standards" for reporting and formatting, campaign tracking, along with some elementary Data Storytelling for Adobe Analytics, which is training I began providing inside Kroger as early as early 2015 to developers and fellow analysts.
- **AEP ASSURANCE:** Within 90 days of hiring, successfully led the Vantus™ Mobile App team to implement and execute AEP Assurance (formerly Project Griffon), giving them stronger debugging and validation capabilities.

THE KROGER CO. – Cincinnati, Ohio (2013 – 2025)

Manager, Digital Analytics at Kroger Personal Finance | Jan 2019 to Mar 2025

Led the executive development of Digital Analytics for Kroger Personal Finance (KPF) across web and mobile apps, rebuilding legacy dashboards with Adobe Analytics Workspace for improved insights.

- **IMPLEMENTATION:** Managed KPF's Adobe Analytics implementation via third-party vendors and internal teams, ensuring alignment with business goals and improved execution of digital analytics reporting by 75%.
- **CJA MIGRATION/REPORTING:** In mid-to-late 2023, supported Kroger's project to transition to CJA and led KPF's transition while running in parallel with Adobe Analytics. The result was 100% migration and configuration of all reporting, dashboards, metrics, visualizations, Marketing Channels, Internal and External Campaign tracking, classifications, and other custom derived fields, as needed. Worked closely with stakeholders to ensure a smooth transition of all reporting to deliver key insights and output.

Jeff Bloomer

Adobe Analytics
Champion 2021 to 2026

Middletown, OH 45042 ♦ (937) 216-7303 ♦ jeffbloomer1993@gmail.com

- **DATA STANDARDS:** Enforced standards for internal and external campaign tracking using Claravine, improving conversion tracking for high-profile eSpots and increased Marketing's accountability by 80%.
- **STAKEHOLDER MANAGEMENT:** Partnered with stakeholders and third-party vendors to regularly define success metrics (Key Performance Indicators and Conversions) for key web and mobile features.
- **DOCUMENTATION:** Created documentation, measurement plans, and project tracking in Confluence, ensuring transparency and knowledge sharing across teams.

Sr Digital Analytics Implementation Specialist | Sep 2014 to Dec 2018

Managed the Adobe Analytics implementation across web and mobile, ensuring seamless integration and data accuracy.

- **CROSS-TEAM COLLABORATION:** Collaborated with Product Managers, Scrum Masters, and Business Analysts to define tagging requirements and align reporting strategies.
- **AGILE/OKRs:** Participated in Program Increment (PI), and later Objective and Key Results (OKR) planning to align Digital Analytics objectives with software development and business priorities.
- **DATA STANDARDS:** Defined and implemented core data standards (defining data requirements, creating data elements, data dictionary, etc.) that formed the foundation of Kroger's current eCommerce digital analytics framework.
- **DOCUMENTATION:** Pioneered and championed both comprehensive documentation and project tracking within Jira and Confluence, which resulted in a ~93% increase in both transparency and efficiency for software development, support, and customer care.

Manager, Web & Digital Analytics | Dec 2013 to Sep 2014

Partnered with leadership to build and support a high-performing Digital Analytics team, strengthening accountability, cross-functional collaboration, and continuous improvement across Digital.

- **REPORTING STANDARDS:** Standardized reporting workflows, improving consistency and increasing efficiency by approximately 75%.
- **DASHBOARDS:** Worked with the Digital Analytics team to build enterprise dashboards to improve visibility into digital performance.
- **VISIBILITY:** Established a recurring reporting cadence with leadership to deliver decision-ready insights.
- **ALIGNMENT:** Aligned data and analytics output and results with strategic priorities via cross-functional partnerships, including Digital Products, Big Data Services, and Engineering.
- **DATA CONSOLIDATION:** Consolidated varying (and quite challenging) disparate data sources, including Digital and Business analytics, into a source-of-truth dashboard used in weekly Digital meetings.

EDUCATION

UNIVERSITY OF PHOENIX – Phoenix, AZ

- B.S. - Information Technology/Multimedia & Visual Communications

SINCLAIR COMMUNITY COLLEGE – Dayton, OH

- Computer Information Systems – Software Development
